side with my own mother under the old cedar in our churchyard on the hill.

One night we had strolled there togother to lay some autumn blossoms on the grave; and so long be lingered there in perfect silence that all my fears and my despair came back to me in overwhelming ferce. Why had he hrought me here where I could see the white drowned face, just as I saw it look when I held itstill below the watern, after the angry death had passed? Should I be obliged to see it thus before me all my life?

Silently, as we had stood there, we turned from the grave side by side; then suddenly Horace clasped me in his arms and kissed me. So tenderly, and yet so passionately, ho kissed me.

Water supply is not far from the house should be ascertained with the atmost certainty that the spring or well is higher than the privies or barn-yards. Insidious and fatal forms of decline and typhoid very often result from persons druking water which is drained from the localities named.

The safest plan, and the only safe plan for farnishing dwellings with the most healthful acd nobjectionable water, is to have a water-tight cistern, and let the water from the roof of the house or burn, or ether out-houses, be conveyed into it through a box of sand averal yards long, this hox to rest on a board, or comented bottom and sides, so that no outside water could get into it.

The Chaplain of the Senate, in an opening prayer, said: "Oh Lord, our God, we come in tidia piece to deplore before Thee the apirit of lying which is abroad, and we beseech Thee to rehake the giant demon of slauder that stalks forth casting upon all the earth a fearful situatow; paralyze the hatter willful detreation; palsy the tongue that atters wanton calmmy—the things which tend to endermine all confidence in the good and to give a malignant power to all the bad elemants for the demoralization and destruction of human society. Let thy fiaming spirit take vengeance upon the false accuser and consume this epirit of run from all the land. This we ask in the name and for the sake of Him who was truth itself."

Citizens of New York city representing \$500,000,000 of capital in a petition to the Senate, asked Congress to put an immediate step to any further issue of greenbacks by the Hecretary of the Tressury, and cause the retirement at once of the legal-tender reserve level.

It is quite generally the custom to take strong liver stimulants for the care of liver complaint, and both the mineral and vegetable kingdoma have been ditigently esarched to produce the most drastic and poisonous pargatives, in order to produce a powerful effect upon the liver, and aronas the lagging and enfeebled organ. The system of treatment is on the same principle as that of giving a weak and debililated mee large portions of bramly te enable ldm to do a certain amonat of work. When the stimulant is withheld, the organ like the system, gradually relapses into a more torpid or eluggish and weakened condition than before. What then he wanted? Medicines, that, while they canse the bile to flow freely from the liver, as that organ is toned into action, will not overwork and thus debilitate it, but will, when their use is discontineed, leave the liver strengthened and healthy.
